ELECTION/RESTRICTION

1. Applicant's election of Group I, claims 1-16 and 23-29, in the reply filed on 3/21/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Upon careful reconsideration of the elected method claims, it was determined that an election of species between distinct method species would be necessary. The examiner apologizes for the inconvenience of not presenting this issue earlier in conjunction with the restriction requirement. The requirement for an election of a species follows.

Election/Restrictions

3. This application contains claims directed to the following patentably distinct species: Group A, claims 1-8, 11-16 and 23-29 and Group B, claims 9-10. The species are independent or distinct because Group A is directed to a bulk ion irradiation process, classified in 148/100, whereas Group B is directed to the irradiation of a magnetic coating classified in 427/523+.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Art Unit: 1773

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
